

Zollner Electronics Americas – Engineering. Industrialization. Secure Production.

With a strong and growing footprint across North and Central America, Zollner Electronics Americas supports customers who require secure, scalable and technologically advanced manufacturing solutions. We combine the agility of regional operations with the strength of a major global EMS provider backed by more than 60 years of electronics and mechatronics expertise.

More than Full Service

- Resilient North American supply chains
- Nearshore and U.S.-based production options
- Fast ramp-up and industrialization support
- Multi-site capacity and business continuity
- Regulatory-grade manufacturing for high-reliability industries

From Idea to Lifecycle Support

We go beyond traditional EMS by supporting the full product lifecycle:

- Design support & engineering
- Prototyping & NPI acceleration
- Industrialization & ramp-up
- Complex box build & system integration
- Global procurement & supply chain management
- Obsolescence & compliance management
- Testing, validation & traceability
- After-sales and lifecycle services

Our setup shortens feedback loops between design and production and ensures predictable delivery performance across time zones.

Americas Presence – Global Strength
