

We are hiring for our Hombrechtikon site (full-time)

Head of Engineering AVOR (m/f/d)

We are looking for you to strengthen our Engineering team!

Zollner Hombrechtikon is part of a globally active corporate group. At our Hombrechtikon site, we industrialize, manufacture and service electronic assemblies and mechatronic systems. Our customers come from sectors such as robotics, industrial electronics, aerospace, medical technology and rail technology – all of which demand the highest quality standards. We are currently seeking a Head of Engineering (m/f/d).

Your Responsibilities:

Strategic:

- Develop and implement the technical strategy
- Lead, motivate and further develop the Engineering team
- Establish, implement and enforce standards
- Represent the department to internal and external stakeholders
- Coordinate internal and external partners to ensure successful customer support
- Provide regular reports on projects and customer requirements to senior management
- Deliver level-appropriate reporting to supervisors and clear communication with employees

Operational:

- Responsible for operational support of customers with complex product and process requirements
- Collaborate closely with Sales, Planning and Quality divisions
- Ensure quality standards during new product integration in collaboration with Quality Management
- Support procurement strategies
- Contribute expertise and assume responsibility in internal and external audits

Your Profile:

- Advanced technical education (BSc or HF) in Electrical Engineering, Process Engineering or a related field
- Several years of professional experience in an electronics manufacturing environment or industrialization processes
- Proven leadership experience in managing interdisciplinary teams with a solution-oriented approach
- Entrepreneurial, responsible and independent personality with strong project management skills
- Passion for technology, quality and continuous improvement
- Proficient IT applications (MS Office, SAP, etc.)
- Knowledge of PCBI and BOM Connector is an advantage
- Excellent English skills, both spoken and written
